

Rilevazione Presenze per PMI

Semplice. Affidabile. Completo.

Il software

Anytime C-Lite è il gestionale per la rilevazione delle presenze pensato per le piccole e medie imprese che cercano uno strumento semplice, affidabile e completo, senza la complessità dei sistemi enterprise.

Grazie a un'interfaccia intuitiva e a un'architettura leggera, permette di gestire timbrature, cartellini mensili, giustificativi e report senza necessità di formazione specifica, configurazioni di rete o server dedicati.

Funzionalità principali

 Importazione automatica Legge file scaricati dai terminali badge e importa il file all'avvio o a intervalli programmabili.	 Cartellino interattivo Ore lavorate, entrate/uscite, giustificativi e scostamenti in tempo reale.
 Anagrafica completa Dipendenti, aziende, profili orari, calendari e festività in un'unica schermata.	 Giustificativi Permessi, ferie, malattie registrati e associati ai cartellini.
 Export PDF e Excel Report mensili pronti per dipendenti e ufficio paghe con un clic.	 Accesso protetto Autenticazione con username e password. Periodo di prova 15 giorni incluso.

Importazione automatica delle timbrature

Il modulo di importazione è il cuore operativo del software. Anytime C-Lite legge i file generati dai terminali badge aziendali e associa automaticamente le timbrature ai dipendenti registrati in anagrafica.

L'importazione può avvenire in tre modalità:

- Manuale: avviata dall'operatore con un clic dalla schermata dedicata.
- Automatica all'avvio: il software importa il file non appena viene aperto, senza alcuna azione da parte dell'utente.
- Polling programmato: il sistema controlla la presenza di un file aggiornato a intervalli regolari (da 1 minuto a 24 ore), operando in background mentre l'operatore lavora su altre sezioni del programma.

Ad ogni importazione viene generato un log dettagliato con il riepilogo delle timbrature elaborate, le eventuali righe con errori e il percorso del file di backup.

Cartellino interattivo

Il cartellino mensile mostra in tempo reale le ore lavorate, le entrate e uscite, gli scostamenti rispetto al profilo orario previsto e i giustificativi inseriti. Le correzioni manuali, aggiunta, modifica o eliminazione di timbrature, sono immediate e tracciate.

È possibile definire profili orari personalizzati per ogni dipendente, con variazioni giornaliere e gestione completa di calendari lavorativi e festività nazionali e locali.
